SUMMARY

Data Analyst with 1 year of experience in SQL, Python, Excel, and Power BI, focused on business data analysis and KPI tracking. Skilled in building dashboards, writing complex SQL queries, and exploring large datasets to support data-driven decision-making. Experienced in working with stakeholders to generate actionable insights, identify trends, and drive business performance improvements.

SKILLS

Programming: Python (NumPy, Pandas, Matplotlib)

SQL: MySQL, PostgreSQL

Analytics Tools: Power BI (DAX, Data Modeling), Excel (Lookup Functions, Pivot Tables)

Tools: Jupyter Notebook, GitHub

Core Skills: Data Cleaning, Exploratory Data Analysis, KPI Analysis, Dashboard Development, Business Insights, Statistics

WORK EXPERIENCE

Graduate Engineer Trainee | HCLTech

Sep 2025 – Present

- Worked on real-time event streaming using TIBCO StreamBase to process **10,000+** data records from external systems for analysis.
- Analyzed and tracked event-driven data pipelines to identify patterns and generate operational insights.
- Applied event-based filtering and rule logic to identify key data patterns and support real-time analytics and decision-making.

Data Analyst Intern | NU Intelligence Pvt. Ltd.

Jan 2025 – Jun 2025

- Processed and standardized **3,000+** student records to track enrollments, progress, and completion rates.
- Built Excel reports using lookup functions and pivot tables, reducing manual tracking effort by **30%**.
- Generated SQL reports to identify course completion trends and low-engagement segments, improving follow-up efficiency by **15%**.
- Collaborated with stakeholders to define KPIs and deliver weekly performance insights to drive business improvements.

PROJECTS

Retail Customer Analytics | Python, PostgreSQL, Power BI

GitHub

- Performed Exploratory Data Analysis (EDA) and data cleaning on **4,000+** retail transaction records using Pandas, improving data consistency and enabling accurate customer segmentation.
- Examined customer revenue distribution using SQL CTEs and window functions, identifying that the top **20%** of customers contributed approximately **31%** of total revenue.
- Designed an interactive Power BI dashboard tracking 3 KPIs, including revenue trends and category-wise sales performance.

Urban Mobility Insights | MySQL, Power BI

GitHub

- Conducted large-scale analysis on **100,000+** ride bookings to derive operational and revenue-related insights.
- Derived key metrics, including booking success rate (**62%**) and cancellation rate (**38%**), using SQL-based analysis.
- Designed a **5-page** interactive Power BI dashboard visualizing booking volume, revenue distribution, vehicle type performance, and cancellation breakdown.

Stock Market Trend & Performance Analysis | Python, Pandas, Matplotlib, Streamlit

GitHub

- Evaluated **five years** of historical stock data (**5,000+** records) using Pandas in Jupyter Notebook to analyze price trends, daily returns, and overall stock performance.
- Identified a strong positive correlation (**0.95+**) between selected tech stocks using statistical analysis techniques.
- Developed a modular Streamlit dashboard enabling real-time comparative performance visualization.

EDUCATION

Yeshwantrao Chavan College of Engineering

Dec 2021 – Jun 2025

B.Tech in Computer Technology

CGPA: 7.80

HSC: 91.83%

Aug 2020 – Mar 2021

SSC: 90.60%

Jun 2018 – Mar 2019

CERTIFICATIONS

Data Analyst Certification – LinkedIn Learning

Certificate

Microsoft Excel Certification

Certificate
