Portfolio

SKILLS

Programming: Python (NumPy, Pandas, Matplotlib)

SQL: MySQL, PostgreSQL

Analytics Tools: Power BI (DAX, Data Modeling), Excel

Core Skills: Data Cleaning, KPI Analysis, Dashboard Development, Business Insights, Statistics

PROJECTS

Retail Customer Analytics | Python, MySQL, Power BI

GitHub

- Cleaned and transformed **4,000+** retail transaction records using Pandas, improving data consistency and enabling accurate customer segmentation.
- Analyzed customer revenue distribution using SQL CTEs and window functions, identifying that the top **20%** of customers contributed approximately **31%** of total revenue.
- Designed an interactive Power BI dashboard tracking key KPIs including revenue trends and category-wise sales performance.

Urban Mobility Insights | PostgreSQL, Power BI

GitHub

- Conducted large-scale SQL analysis on **100K+** ride bookings to derive operational and revenue-related insights.
- Derived key metrics including booking success rate (**62%**) and cancellation rate (**38%**) using SQL-based analysis.
- Designed a **5-page** interactive Power BI dashboard visualizing booking volume, revenue distribution, vehicle-type performance, and cancellation breakdown.

Stock Market Trend & Performance Analysis | Python, Pandas, Matplotlib, Streamlit

GitHub

- Analyzed **5 years** of historical stock data (**5,000+** records) using Pandas to evaluate price trends, daily returns, and overall stock performance.
- Identified strong positive correlation (**0.95+**) between selected tech stocks.
- Developed a modular Streamlit dashboard enabling real-time comparative performance visualization.

WORK EXPERIENCE

Graduate Engineer Trainee | HCLTech

Sep 2025 – Present

- Worked on backend systems using Java and SQL to manage structured application data.
- Ensured data accuracy, integrity, and smooth system performance.
- Collaborated with cross-functional teams to resolve data-related issues.

Data Analyst Intern | NU Intelligence Pvt. Ltd.

Jan 2025 – June 2025

- Analyzed **3,000+** student performance records using Excel and SQL to identify academic trends.
- Cleaned and validated student performance and enrollment datasets, ensuring data consistency and improving reporting accuracy.
- Developed interactive dashboards tracking completion rate and enrollment growth, enabling data-driven academic planning and performance monitoring.
